## SUMMARY

---

6 years turning ambiguous 0→1 bets into shipped products and closed revenue, across enterprise AI, cloud infrastructure, and martech. Builds GTM strategy and sales enablement from firsthand customer insight, and moves engineering, finance, and sales toward shared outcomes.

**Toolkit:** GTM strategy, positioning & messaging, sales enablement, market segmentation, feasibility & competitive assessment, pricing & packaging, A/B testing, funnel & conversion analysis. SQL, Amplitude, Tableau, Figma, Jira, Claude Code, Replit, Cursor. Structured program management.

## EDUCATION

---

|                                                                              |          |
|------------------------------------------------------------------------------|----------|
| MBA   University of California, Berkeley – Haas School of Business           | May 2025 |
| B.E., Electronics & Communication   Indira Gandhi Delhi Technical University | May 2018 |

## EXPERIENCE

---

|                                                                                       |                     |
|---------------------------------------------------------------------------------------|---------------------|
| <b>Adobe</b>                                                                          | San Jose, CA        |
| <i>Product Marketing Manager – Marketo Engage, Marketo Optimizer, Brand Concierge</i> | Jul 2025 – Present  |
| <i>Product Marketing Manager, Intern – Adobe Marketo Optimizer</i>                    | May 2024 – Aug 2024 |

- Defined the ICP, positioning, packaging and pricing for Brand Concierge, Adobe's LLM-powered brand visibility solution, targeting cross-sell across 5 verticals and designing a trial period offer
- Drove 30+ feature launches end-to-end and improved renewal rate 3% YoY through adoption playbooks: advisory boards, user groups, and deal-health analytics
- Led monthly sales enablement sessions and modernized the existing process by building AI-powered workflows that let field teams self-serve answers to product questions and generate use cases illustrating applications of features across industries
- Influenced \$4M+ in pipeline for Marketo Optimizer and pulled deals ~30 days ahead by running 15+ engagements at Adobe Summit (sales meetings, discovery calls, demos, hands-on labs, and Ask Me Anything sessions)
- Shortened renewal timelines for Brand Concierge by 15% by identifying where adoption stalls through customer interviews and user surveys and realigning cross-functional teams to focus more on user experience than AI model quality
- Led feedback programs, A/B tests and user interviews for Marketo Optimizer with 25+ design partners, validating product-market fit ahead of go-live and surfacing 8 key adoption blockers / product changes
- Designed the Marketo Optimizer trial offer from beta-program learnings and analysis of customer interaction and AI credit usage, targeting 30% trial-to-paid conversion. Built a 49-customer pipeline through community forums and by influencing sales leaders to position the trial as a retention play for at-risk Marketo customers
- Rallied finance and sales to close 3 deals for Marketo Optimizer worth \$800K ahead of GA, proving revenue before the product was even generally available

|                                                                                 |             |
|---------------------------------------------------------------------------------|-------------|
| <b>Tata Communications</b>                                                      | India       |
| <i>Product Manager – B2B Cloud &amp; Edge Connectivity, Fortune 500 Clients</i> | 2021 – 2023 |
| <i>Associate Product Manager</i>                                                | 2018 – 2021 |

- Led a 0→1 high stakes bet for the business, launching an ML-based fraud detection platform from concept through production that blocked 6M+ fraud attempts globally and earned international media recognition
- Built and ran a market entry & GTM experiment, repositioning product messaging and deploying a dynamic pricing model for high-value segments after competitive and market segmentation analysis, growing customer base 20% and increasing sales 200%
- Rallied 10+ cross-functional teams across engineering, marketing, and sales around a unified product vision, launching a SaaS solution that generated \$2M in cross-sell revenue
- Took a new platform from concept to scaled adoption, conceiving and shipping a self-service cloud connectivity portal from zero, owning feasibility analysis, market research, and launch execution, securing \$33M in pre-launch sales and removing dependency on high-touch sales
- Built a value realization framework with clear milestones and tracking (traffic, SLAs, latency) to diagnose and resolve a 2-year service degradation issue and ship corrective fixes to production

## INTERESTS

---

Film and storytelling. I study, discuss, and critique films. Ask me for a recommendation.
